Activity schedule — TG-2
Collect & clean crypto HF data (book + trades)
Hawkes simulation engine (Ogata thinning)
MLE baseline + paper replication (Lee, 2023)
Baseline 3-layer LSTM & validation
Alternative architectures (GRU, deep, attention)
Comparative experiments & metrics (MSE, time)
Application: intraday Hawkes volatility
Results analysis & robustness
Final thesis writing (TG-2)
TG-2 defense preparation
Aug
Sep
Oct
Nov
Dec
Fortnights (TG-2 — second half of 2026)
